We are having some pretty weather, for which the farmers are thankful. Quite a lot of improving has been done in our community since we last gave an account of ourselves.

Health of the community is good, except a few cases of measles.

—Correspondent.

April 16, 1913.

S. T. PATE ON GOOD ROADS.

S. T. Pate of Harvey, in discussing the proposed trial sand-clay road between Bryan and Wellborn, said that the present road system would be much improved if properly cared for. No one was more heartily in favor of good roads than he, but the expenditure of any large amounts should be carefully considered, for a number of the farmers in the county are struggling hard to get ahead and a good start in life, and can not afford to pay for expensive mistakes.

Mr. Pate believes in the farmers getting together and sanding and claying bad stretches of road themselves. The cost of having the work done is very high, and could be avoided by co-operation. As to the proposed test road, it depends on the amount of money it would take to put it into shape.
